~~Sir Roderick Impey Murchison~~

[small Type]

Sir

†[T]he letter marked  
Nº I. is a copy from  
memory chiefly, of one I  
sent under date of August  
last which, with a map  
of the country travelled  
over, I have lately ~~learned~~[heard],  
was lost in the destruction  
of the "Forerunner" off  
Madeiria. I had [^][The] fever

[0002] [2] so frequently after leaving  
Cassangé[that[that]] I ~~took~~[could only take] Latitudes [,]  
~~only putting~~[inserting[inserting]] them and  
my route in pencil:[and]  
I promised to send a  
better m[M]ap of Angola back  
from e[C]assange on my  
return. ~~by the unfortunate event above noticed I am obliged to send you a sketch of the whole  
way,†[T]his I shall do as I originally intended from~~  
the last point to which  
the Postal arrangements  
extend. I have been

[0003]

detained some time here re-  
producing ~~my~~[the] letters ~~by~~[lost in] the  
"Forerunner". [and][and] I leave for  
Cassangé tomorrow morning.  
[ ( NP.)] I [naturally] feel some little regret at  
the loss of ~~the~~[my] ~~m~~[M]ap, for  
believing it safe in your  
hands, I have been rather  
free in giving [away] Latitudes, &  
Longitudes and Sketches of  
the country, some of which  
have been [copied and] sent to Germany.  
~~[by a german botanist, who is here,]~~ And I have some Ambition[;[,]]  
as I am the only one who  
ever made astronomical  
observations in this ~~country~~[part of the world,]

[0004]

that ~~[England]~~ my own ~~Father Land~~[Country]  
should have the preference[.-]

[At present] I give the following list [(see List) [Insert List]]  
~~at present.~~

~~Golungo Alto. Latitude south 9° 8' 30" ; Long. 14° 59' 21" tThis is the mean of seven  
Lunar Observations. tThe residence of the chief or commandant of the district is the point of  
observation~~

~~About 10' West and in Lat 9° 15' 0" is the confluence of LuinhuaLuinha and LucallaLuce  
Rivers in the district of Cazengo. Lat. 9° 26' 21". confluence of Luinha and Lucalla; 3° west of  
this point stands the ancient iron foundry erected by order of Marquis of Pombal~~

~~Lat. 9° 37' 50". confluence of Lucalla & Coanza, on which stands the fort and town of  
Massemgano. I could get no Lunar there, but I have bearings which will give an approximation  
to the Longitude.~~

~~Ambaca. Residence of the Commandant Lat. 9° 16' 35" S. Long. 15° 23' 15" E.~~

~~Pungo Andongo. the residence of Mr Piris, on the South side of the Rocks. 9° 40' 35" S.  
Lat. The Fort is probably exactly on 9° 40' the Long. by three good observations each giving  
nearly a similar result in 15° 33' 40" E. Lat. of Coanza R. at a point S.S W. of the fort of  
Pungo Andongo 9° 47' 3". It runs closer to this, than that on the South East viz: 3 or 4 distant~~

~~[]The above are given at present as a pre-caution. I shall put all I have into the map  
and in another letter to be marked No II. will furnish information respecting this Province itself.~~

I am, Sir

Yours Faithfully

David Livingston
