Hadley Green

Barnet 25th July

1857

My Dear Sir

I beg to
return you my
hearty thanks
for your work
on Lunars
and the kind
offer which

[0002]

accompanies
it .
It is only this
morning that
I have been
able to look at
your note. Some
of my observations
gave discordant
results this
induced me to
send my observation

[0003]

book to the
Astronomer Royal
to have any
errors of trans-
cription rectified
and some have
been detected but
as I handed
them over at
once to M^r
Arrowsmith to
be used in the

map, I don 't yet

[0004]

know their value .
The sextant was
damaged on board
the Frolic on our
way to Mauritius
& recut so I could
not do what
you suggest.

hanking you
heartily
for your
kind offer I am

Dear Sir Yours &c

David Livingstone

I am to visit Admiral Smythe at D^r Lee's
could I see you there?
