LXX.

Lions fat is regarded as a sure preventative of [24
]

Tsetse or Bungo - This was noted before but I add now
that it is smeared on the ox tail - preserves hundreds of the
Banyamwesi cattle in safety while going to the Coast -
It is also used to keep [...] pigs and Hippopotami
away from gardens - - The smell is probably
the efficacious part in Heresi

12 Dec^r It may all be for the best that I am so
hindered and compelled to inactivity - advance
to Lohombo was the furthest point of traders
for many a day - slaves returning with ivory
were speared mercilessly by Manyema because
they did not know guns could kill & their
spears could - Katomba coming to Moenekuss
was a great feat three or four years ago
Then Dugumbe went on to Lualaba and fought his
way - So I may be restrained now in mercy
till men come - those I had were not men nor
yet slaves - Hybrids between bond & free so petted
& coddled as to think the English feared them
[0002]

LXXI

The Neggeri an African animal attacks the
testicles of man and beast - cuts them off and retires
contented - Buffaloes are often castrated by him -
Men who know it squat down & kill him with knife
or gun - ~~Lions fear him~~ [the] Zibu or Ratel
Zibu or Mbuidé flies at the tendo achilles =
Ratel? - Fisi ea Baharai probably the seal
is abundant in the seas but the Ratel or badger
probably furnished the skins for the Tabernacle
Bees ~~die or~~ escape from his droppings
~~or~~ urine and he eats the honey in safety -
Lions & all other animals fear his attacks of the heel
the Babemba mix a handful [about 25 to a measure] of castor oil seeds with
the dura [^] [and] they pœu[gri]nd [Meleza] = usages makes them like it
The nauseous taste [is not perceptible in porridge] and the oil is needed where so

much farinaceous or starchy matter exists and experience [^] [the bowels are regulated by the mixture] has taught them the need of a fatty ingredient

Moamba - Chassa - brother of D^o Chambeze = other brother of Chassa - D^o in way - Moenewifa large country - Komanga and 6 days to Barari thence
[0003]

LXXII.

Goambari is a prisoner at Merere's guarded [25
]
by a thousand or more men to prevent him intriguing with Monyungo who is known as bloodthirsty - In the third generation charura's descendants numbered sixty able bodied spearmen - Garahenga [^] [or Kimamure] killed many of them - charura had six white attendants with him but all died before he did and on becoming chief he got all his predecessors wives - Merere is the son of a woman of the royal stock and of a common man - Hence he is a shade or two darker than Charura's descendants who are very light coloured and have straight noses - They shave the head and straight hair is all cut off - they drink much milk warm from the teats of the cows and think that it is strengthening by its heat. The descent is

- 1 Charura -
- 2 Mokasi -
- 3 Moenye-gumbe =
- 4 Mamerere = Merere =

Mogandira son of 3
died after one years rule - Kimamure a coward followed
2nd son of 3 made Merere general = Goambari called Monyungo to first Merere - Kimamure or otherwise Garahenga killed many by Merere's hand - calls himself his slave but rules him and all besides
[0004]

LXXIII

Dec^r 23^d 1870 - Bambarre people suffer hunger now because they will not plant cassava - This trading party eats all the maize and sends to a distance for more - Manyema buy from them with malofu or Palm toddy - Rice all coming into ear but Manyema planted more Maize ripening - mice a pest a strong man among Manyema does as he pleases &

no chief interferences - a man's wife of ten goats was
given off to a Mene man and his child now grown
is given away too - comes to Muhamad for redress
Two Elephants killed were very large but have
small tusks - They come from South in the rains
All animals as elephants buffaloes - zebras
are very large in Basango country - tusks full
in the hollows weigh very heavy - animals fat
& good in flesh Eleven goats for the flesh

24th Between 25 and 30 slaves have died in the present
epidemic - also many Manyema - Two yesterday at
Kandawara - The feet swell then the hands and
face and in a day or two they drop dead - It came
from the East and is very fatal - few escape who take
it.

[0005]

LXXIV.

a woman was accused of stealing maize - the ch[...] [26
]
here sent all his people yesterday - plundered all she had in [...]
house and garden and brought her husband bound in
thongs till he shall pay a goat - She is said to be inn[...]
Monangoi does this by fear of the traders here an[...]
as the people tell him as soon as they are gone th[...]
vengeance he is earning by injustice on all sides
will be taken - I told the chief that his head would
be as also Kasessa's.

Three men went from Katomba to Kasongo's to
buy viramba - a man was speared belonging to
Kasongo - these three then fired into a mass of
men who collected one killed two another three & so on
So now that place is shut up from traders -
and all this country will be so as soon as the
Manyema learn that guns are limited in their power
of killing and especially in the hands of slaves who
cannot shoot but only make a noise - These Suaheli
are the most cruel and bloodthirsty missionaries in
existence and withal so impure in talk & acts - spreading
syphilis Buboes & chancres- The Lord sees it.

[0006]

LXXV

28 Dec^r 1870 Moenembag the most intelligent of the
two sons of Moenekus in power told us that a man was
killed & eaten a few miles from this yeaterday - Hunger the reason
assigned = on speaking of tainted meat he said that the Manyema
put meat in water two days to make it putrid & smell high = The
love of high meat is the only reason I know for their cannibalism

but the practice is now hidden on account of the disgust that the traders expressed against open man eating when they first arrived - Lightning very near us last night - The Manyema say that when it is so loud fishes of large size fall with it - an opinion shared in with them by the Arabs = But the large fish is the clarias capensis of Smith and it is often seen migrating in single file along the wet grass for miles - It is probably this that the Manyema think falls from lightning.

30th Rain daily - a woman murdered without cause close by the camp - murderer said she is a witch & speare[...] her - body exposed till affair is settled probably by fine of g[...] the Manyema are the most bloody callous savages I know - one puts a scarlet feather on ground and challeng[...] those near to stick it in the hair - He who does so must kill a man or woman - and so none dare wear skin of musk ca[...] Ngawa unless he has murdered - guns alone prevent them from killing us all - and for no reason either.
