Candumba & Lombe

[0002] known to East of Golungo (15° 2' E) both from calculations & sketch I sent to Society. M<sup>r</sup> Maclears made three positions of 15° 2' probably an error my transcribing Lunar distances him. Now suppose you

[0003] M<sup>r</sup> A. both my sketch and

M<sup>r</sup> Maclear's - I cannot why detecting discrepancy mine

& Maclears should you so much I dont understand matters. Is any adjustment my sketch? If so whose authority?

[0004] reject those of

M<sup>r</sup> Maclear that not accord with reckoning & of the country probably having errors of in them  
"If the "adjustment" followed on same principle the materials supplied by Must pay for it?

[0005] objected to two as they stood the journal he made corrections the following way.

He put down according Maclear till came to Ambacca corrected to 15° 23' as my sketch

[0006] once my or calculations he dealt with

Candumba and

Lombe in the same . He sent the proof the notes. I to the note line. "These positions  
ascertained to erroneous from M<sup>r</sup> L's own

[0007] & sketch not from other source none other ever made the country"
