My Dear M^r Murray

When you asked about appendices I forgot my ob $\frac{ns}{}$ calculated by Maclear. Admiral Smythe's son in law [0002]has very promptly undertaken the editorship and as he has found out a new way of correcting Lunars and says Maclears work is admirable I think it will lend interest to the book among the [0003]scientific. Printed in small type I suppose it will not occupy much space Captain Toynbee will perhaps need a few Nautical Almanacs from you. I am at Tete in correction [of slips] will finish all except the set up

sheets [0004]

on Wednesday. I go

to Dublin on Thursday Did you ever get an opinion on the grammar perhaps the observations will be a better appendix than it M^r Rae, Common wealth newspaper wants an early copy for friendly review. I said I would send the order [0005]to you He is 37 Jamaica St. Glasgow If you send a copy to the Editor of the Edinburgh pray let it be one in which an error in page 96 is corrected. He has printed some [0006]sheets correctly. I would like to give Captain Need & D^r Smith a copy each for their kindness in giving the drawings -I sent off this morning page 544 Press [0007]and the last bundle of slips but two

If you ever were afraid of my not giving you bulk you are not so now for I have an index I am &c

D. Livingstone
