Mazaro, Zambesi River 25 March 1860

My Dear Friend

After the very scurvy letter I sent you last I feel bound to write you again though I have nothing to say - but I see that our friend Brand is appointed to Lagos and as we have succeeded in rendering the fever here not more formidable than a common cold it may be a good service to let him know through you how we treat it. We cure it quickly, and without loss of strength to the patient by a pill with which we shall cut out Holloway when we have finished with Africa - It is composed of for a full grown man, eight grains of Resin of Jalap - the

Our little steamer is quite done - We have 35 patches on her bottom held on by 60 bolts - The steel plate has undergone a peculiar chemical decomposition and is full of minute holes besides - your

[0002]

same quantity of balomel - four or six grains of Rhubarb & the same quantity of quinine the whole well rubbed together in a mortar & made into pills with a few drops of the tincture of Cardamoms - will relieve any fever we have on this coast. Decreasing doses serve - Half a grain of the mass has now as much effect on us as th 24 or 28 grains formerly had - It is what I found best

for my attacks when alone. It produces a terrible raw inside but all after effects are avoided A fellow with his head like to split or another in a state of somnolency is relieved in a few hours so that we have called them "Rousers." A weaker man than Brand would be operated on by four grant of the first ingrediant and three of the latter -

Well we are determined to get a small steamer on the Lake Nyana and now send our engineer M^r Rae home to superintend its construction. ____Government [0003]wont afford the means I have a few Thousand Pounds from my book and have ordered them to be spent therein - I want a few settlers for I think that a few good industrious English afforded protection by the steamer would do more to eradicate slavery on a large section of the East coast than several on the ocean - The Portuguese are a nuizance in the way but I am in hopes that Lord John Russell will get us freedom of navigation on the Zambesi to our discoveries by parts of the river and of the Shire with which these people do nothing - Here they are much more degraded than with you very few in number & awefully immoral - Our painter joined their orgies & was dishonest so I had to send him away. We are hated as sort of standing protests against vice and uncleanness.

Allow me to congratulate you on your promotion - Will this [0004] involve another ten years service? Hope your naval companion is agreable I begin to believe Bedingfeld's repeated declaration that

"half of the naval Captains are mad" A captain Gordon of "Hermes" came up with us to Mazaro in his boats - We parted good friends, but Bedingfeld & he having quarrelled with the Captain of the Pearl, Gordon subsequently wrote a letter to Bedingfelt & sent me a copy - In it he blames Duncan severely and accuses me of several falsehoods and insultingly alludes to the losses of men by Machine & Berkeley on the bars of Quilimane & Luabo as attributable to "D^r Li undertakings" - I had no more idea of stating what was untrue than I have now of swearing at you -Gordon asserts that it is untrie that masse[...] of putridity were exposed to view after I had taken charge of this vessel though at the tim it happened he was at Simon's Bay - D^r Kir[...] certified it on the spot, and Bedingfeld had neglec[...] my orders about it - Every other statement is made on mere hearsay & it is plain that Bedingfeld has made a mere windbag of him - I would have sent it home but though[...] it more christian to write & explain the orders under which I acted and the points of which he had no personal knowledge, but this affair does not increase my respect for R.N. -
